Welcome to Didax 2024

Inside this edition of our Dealer Catalog, you'll discover a powerful lineup of hands-on Pre-K–12 teaching and learning that cover math from beginning numeracy to advanced algebra and geometry. You'll also find a carefully curated collection of games and manipulatives designed to support both early literacy and social-emotional learning.

Looking for New Products? See Pages 2–3

We've added new manipulatives to help young learners master counting concepts to products that boost multiplication fact fluency and games that build students' social and literacy skills. Altogether, our new products extend and enhance your ability to say "Yes!" to your customers' requests.

Your Feedback Matters. The Lines of Communication are Open . . .

As you work with your customers, you have a direct line into their instructional needs, challenges, and opportunities. At Didax, many of our best new product and program ideas come from our dealer community, and we invite you to share your ideas and suggestions so together we can support educators and students everywhere.

Email us at info@didax.com and we'll keep the conversation going!

Thank you for your interest and continued support for math and active learning success.

Linda Andries

Head of Product, Sales & Marketing
Didax, Inc.

We Are the Partners Dealers Count On!

On behalf of the entire Didax team, we want to thank you for your partnership as we work together to support students, teachers, and parents everywhere. Our goal is to deliver innovative, value-packed manipulatives and instructional resources so you can help your customers meet educators' and students' needs.

Every Didax customer depends on our commitment to innovation, value, quality, and safety. That commitment has always been central to the success we share with the dealer and educator communities alike.

We are expanding our warehouse and distribution facilities and prioritizing new product development...all focused on continually improving support for every customer. We've launched new sourcing initiatives and are continuing to strategically expand our product lineup to keep pace with changes in instructional standards and challenges. And of specific interest for our dealer partners, we are developing new retail programs that dealers of all sizes around the world have requested. Your success is our priority.

When educators and dealers think of Didax, they think of active math and active learning, backed by a commitment to total value. With our lineup of new products and a network of partners like you, the year ahead looks bright.

Yours in partnership,
The Didax Team

New Products & New Ways to Enrich Instruction!

From calculators, counters, and number paths for younger learners to new manipulatives created to help students master multiplication and more, our lineup of new products for the year ahead delivers new options to make math easier to teach and more fun to learn! And don't miss Questioning Skills Games, the newest active learning game set to join our lineup!

Didax 0-20 Shape Playing Cards

These 84 versatile cards allow students to visualize numbers 0-20 and learn 4 basic shapes—circle, square, triangle, and diamond. Each card shows the number represented as a ten-frame using the shapes and support mastery of foundational math skills. Cards come in separate sets of 0-10 and 11-20 to differentiate beginner and advanced play.

Multiplication Fact Fluency Cards

Multiplication Fact Fluency Cards are an easy yet effective system to learn multiplication facts. The cards have an array of dots for each fact. Students work through the color-coded sets of cards and use facts they know to learn new facts. Cards also have the "turn-around" facts and related division facts on the back. Fun practice and immediate feedback help students master multiplication facts!

Jumbo Unifix® Cubes

Pre-K Math Kit

Skill-Building Activities and Games

Build early math skills with this collection of activities to use with our chunky Jumbo Unifix Cubes. Little hands will have fun sorting, counting, comparing, and building! Along the way, children will develop critical early math skills. Activities include number recognition, one-to-one correspondence, counting, the concept of 10, math vocabulary, and more. Set includes 20 Jumbo Unifix Cubes, 3 Double-Sided Memory Activity Cards, 2 Double-Sided Pattern Activity Cards, and 11 Double-Sided Number Cards 0-10. Perfect for small group play at school or fun at home.

Grades Pre-K-K

212121 • \$24.99

Included in Kit:

- **20 Jumbo Unifix Cubes**
- **3 Double-Sided Memory Activity Cards**
Featuring six different concepts, these cards will build an early understanding of numbers, shapes, colors, and more.
- **11 Double-Sided Number Activity Cards 0-10**
These cards feature representations of numbers 0 to 10 as the numeral, a five- or ten-frame, and as a collection of Jumbo Unifix Cubes.
- **2 Double-Sided Pattern Activity Cards**
With these, children will build increasingly more difficult patterns until they're ready to create patterns on their own.

Same but Different

90 Visual Prompts for Math Discussion

by Sue Looney

These colorful cards will inspire dynamic mathematical conversations. Using photographs, illustrations, equations, and more, each card features a content-rich image comparison. Ask students to explore the math by asking, "What is the same? What is different?" about the two images. Display the cards for whole-class instruction, set them up in centers, or use for small-group instruction. Each set includes three sets of 15 double-sided cards in each of the domains highlighted below, plus an instruction card for a total of 46 cards. Each card measures 4" x 6".

Math Activators

by Heidi Sabnani and Molly Vokey

The ideal resource to practice, reinforce, or reteach fraction, decimal, and integer concepts.

Many students struggle with the foundational skills they need to master more challenging concepts in middle school and high school. Teachers use *Math Activators* as a discussion starter to help students master key concepts.

In grades 3–5, the activators enrich number talks to reinforce fraction, decimal, and integer concepts as students are learning.

In grades 6–8, teachers use the activators to prompt classroom dialogue and reinforce key concepts with students as they explore grade-level content.

In grades 9–12, the activators are used to guide discussion as students review foundational skills needed to succeed in high school math.

Use *Math Activators* as an engaging ten-minute activity at the beginning of class to support learning. Teachers use the digital resource to display an activator, and the full-color teacher pages provide discussion prompts and sample solutions.

Grades 3–12

212126 • \$34.99

Included with the program:

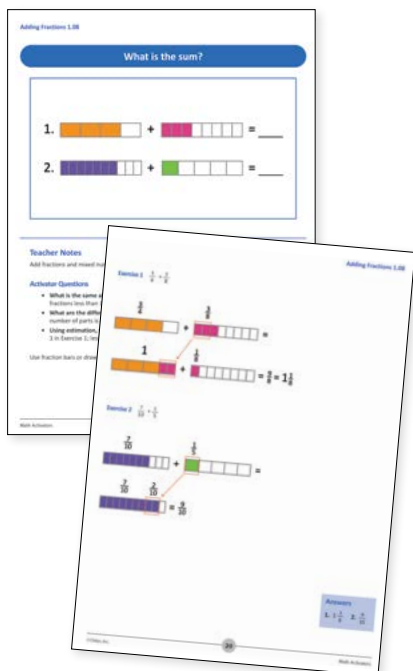

- 160-page Teacher Guide and Activators
- Digital access to Activators
- Bonus Content online

Unifix Operations Tray

The Unifix Operations Tray is a great tool for demonstrating addition and subtraction problems. To demonstrate addition, fill the slots on each side with Unifix Cubes and then combine the cubes in one channel to see the results. For subtraction, first fill one side and then move some of the cubes to the other side. Includes activity ideas. Tray measures 14.5" x 2.5".

Grades K-2

211254 • \$7.99

Unifix 1-10 Stair

The "Stair" consists of ten joined vertical grooves in which joined rods of Unifix Cubes are placed to match the values printed at the top of each groove. Cubes placed in the grooves demonstrate each number as a grouping of ones.

Grades K-3

210838 • \$9.99

Write-On/Wipe-Off Unifix Mats

These mats can be used with or without Unifix Cubes to help students understand number concepts and basic operations. One side features a 1-10 stair for counting or simple operations. On the other side, students start with loose cubes and build a rod. Mats (9" x 12") are heavy vinyl and ideal for use with erasable markers. Set of 10.

Grades K-1

211585 • \$16.99

Unifix 1-10 Value Boats

This essential Unifix aid is great for ordering, comparing, estimating, and simple operations. Students fill their "boats" to visualize and represent numbers. Includes ten pieces designed to fit Unifix cubes stacked from 1 to 10 and teaching notes. Boats range from 1.75" for a single cube to 8.5" for the ten-boat.

Grades K-2

211250 • \$9.99

Unifix 1–120 Number Line

Designed for use with Unifix Cubes, this Number Line is made in sections that can be connected as needed depending on the desired usage. The Number Line enables children to count, compare, add, subtract, and visualize place value concepts. Each section of the line measures 2.25" x 7.25"; when fully assembled, the number line is over 7' long. Includes teaching notes with CCSS alignment. Cubes sold separately.

Grades K–2

211504 • \$26.99

Unifix Cubes Large Magnets

100 colorful demonstration magnets in ten colors (2" squares).

Grades K–3

2-737 • \$26.99

Unifix Cubes Hundred Base

Use this versatile tool and Unifix Cubes to model and understand number concepts, base ten, and operations through 100. Base is 3" x 9" with 10 positions and includes 22 number label cards (10s, 20s, 30s, 40s, 50s) and a 100-grid card. Teacher's Guide includes illustrated activities. Unifix Cubes are sold separately.

Grades K–4

211771 • \$9.99

Unifix Graphing Base

It's easy and fun for children to create simple graphs and work with data using this base with standard Unifix Cubes. Base is 4" x 9" with 6 positions and includes write-on/wipe-off display card and full-color sample strips to identify data. Teaching notes available. Cubes sold separately.

Grades 1–5

211088 • \$10.99

Attribute Buttons with Laces in Jar Spring 2024

High-quality Attribute Buttons in 6 colors, 6 shapes, and 2 sizes, with 2 different buttonhole options for lacing. Students can use the buttons to sort and classify, make patterns, learn shapes, and develop fine motor skills. Includes 144 total buttons, 12 laces, and an Activity Guide. Packaged in a sturdy plastic jar with a handle.

211345 • \$24.99

Numeral Cards

Great for a variety of activities!

Includes 10 sets of Numeral Cards. Each set is packaged in a ziplock bag and includes 11 cards with numerals 0–10 on one side and the dot pattern for the number on the reverse. Each card measures 2.5" x 3" on durable cardstock. Numeral Cards not packaged for retail.

Grades K–2

211014 • \$19.99

1–20 Activity Cards

Math fun with numbers 1–20—five different ways!

This colorful deck represents the numbers 1 to 20 five different ways: in numerals, words, dot patterns, ten-frames, and fingers. Use for a variety of fun learning games to develop skills from early counting to operations. Includes activity ideas. Each card measures 2.5" x 3.5". Set of 102 cards.

Grades K–2

212123 • \$14.99

Sandpaper Numerals

Sandpaper Numerals offer an important tactile experience for the young child in learning correct numeral formation. The 2.5" numerals have directional arrows next to each numeral to ensure proper formation. Each single-digit card measures 2.75" x 4.25". Double-digit cards measure 5.5" x 4.25". Grades K–1.

Working with the 100-Bead Rekenrek

By Don Balka

These engaging activities use the 100-Bead Rekenrek to extend students' understanding of counting, place value, the four operations, and algebraic thinking. Students will make groups of tens and ones, add and subtract within 100, explore multiplication as repeated addition, and more. Each of the 24 lessons is correlated to current standards and includes instructions, assessment questions, and blackline masters. 96 pages.

Grades 1–3

211267 • \$19.99

Working with the Rekenrek

By Don Balka and Ruth Harbin Miles

Using the 20-bead Rekenrek, these 48 activities help children master early skills such as counting, subitizing, the decomposition of numbers, and more. Each lesson is correlated to the Common Core content and practice standards and includes step-by-step instructions, suggested assessment questions, and reproducible blackline masters. 180 pages.

Grades K–1

211752 • \$19.99

100-Bead Rekenrek Group Set

Introducing the Multiplication Fact Fluency Cards Classroom Edition + Individual Card Packs for Each Student!

Now, teachers can help students master their multiplication facts, so they can make real progress in higher order math skills and concepts.

The Multiplication Fact Fluency Cards Classroom Edition includes online access to comprehensive resources to teach multiplication and division facts through 100. This gives teachers an easy-to-implement yet effective system to teach multiplication facts.

The cards provide a visual model expressed as an array of dots for each fact. By focusing on developing fluency with one set of facts at a time, students can use facts they know to solve unknown related facts in other sets. Students apply their knowledge of each fact to the related multiplication “turn-around” facts as well as related division facts on the back of each card. Purposeful, fun practice and immediate feedback helps students master multiplication facts and build fact confidence!

- Visual approach using dot arrays.
- Develop strategies for each set of facts using known facts.
- Learn all related \times and \div equations together.
- Answer to fact on the back delivers immediate feedback.
- Learning one set of facts at a time builds confidence.
- Students build multiplication confidence by developing strategies for each new set of facts using the facts they already know.
- A detailed yet usable Teacher’s guide provides rationale, pedagogy, and lessons for introducing each set of facts.
- Multiple versions of assessments for each set of facts help teachers and parents guide instruction and practice.
- Timed slideshows of each fact set allow for oral assessment and additional dynamic practice.
- Customizable Family Letters guide parents and caregivers through the structure and rationale of the cards, so they can support their children in developing proficiency with multiplication facts.

Students write their name on the card packs and keep them for home and school practice.

Dice Games for Multiplication Mastery

66 Games to Improve Fact Fluency

By Mary Saltus and Chet Delani

Invite students to playfully compete with each other in these dice games of skill and chance. Designed to promote fluency in multiplication facts 2 through 12, these games reinforce number sense and the properties of multiplication. The set includes 33 double-sided cards for a total of 66 games. There are six different dice games included, with 11 variations for each game (each game includes a card focusing on a specific multiplication fact from 2 to 12). Instructions are included on each game card, making these ideal for use in small groups or stations. (Dice not included.)

Dice Activities for Division

More than 20 different games for developing fluency with divisors, dividends, quotients, and remainders. Teacher notes include suggestions for differentiating instruction and discussion questions. 112 pages.

Grades 4-6

211334 • \$17.99

Dice Activities for Subtraction

These dice games provide opportunities for students to develop fluency with basic subtraction facts. Activities develop the concepts of minus (take away) and difference (comparison). 136 pages.

Grades 1-3

211222 • \$17.99

Dice Activities for Mathematical Thinking

These activities immerse students in developing fluency with the concepts of square numbers, square roots, primes, factorials, summations, and positive and negative integers. Includes game mats for over 75 activities. 136 pages.

Grades 5-8

211096 • \$17.99

Dice Activities for Time and Money

More than 80 activities to help children develop fluency with time and money as they learn how to tell time on an analog clock, calculate elapsed time, become familiar with coin names and values, make change, and more. 128 pages.

Grades 1-3

211392 • \$19.99

Dice Activities for Algebraic Thinking

In this introduction to algebraic concepts, students explore the idea of algebra as a "balancing act" using dice and colored tiles with team activities that provide a reason to use algebraic concepts. 136 pages.

Draw & Solve Word Problems

Drawing is a highly effective way for students to model and solve problems and to show their mathematical thinking. Each of the classroom-tested worksheets in these resources features a word problem along with space for students to draw the problem and work through their solution. Aligned to the standards, each book is organized by key types of problems for that grade level.

Sum It Up!

By Becky Duprey

Sum It Up is a must-have board game for any classroom!

With three games in one, there is an opportunity to get the whole class playing and practicing addition at once! Sum It Up plays like SCRABBLE¹—players place tiles in a row on the board horizontally or vertically. The goal is to make sure the tiles all add up to a target number for that game—whether it be 10, 20, or 100! Earn points based on the number of tiles you place; build in two directions or land on a +10 square to score even more! Children will love playing this challenging, fun game over and over again. Each set includes three game boards, three tile sets, three drawstring bags for storage, rules, and score sheets. For 2–4 players.

Sums of 10, 20, and 100

Set includes three games.

- Sums of 10—Place pieces in a row to sum to 10.
- Sums of 20—Place pieces in a row to sum to 20.
- Sums of 100—Place pieces in a row to sum to 100.

Grades 1 and up

211880 • \$36.99

Sums of Fractions, Decimals, and Integers

Set includes three games.

- Sums of Fractions—Place pieces in a row to sum to 1. Includes halves, quarters, eighths, and twelfths.
- Sums of Decimals—Place pieces in a row to sum to 1. Includes decimals from hundredths to ones.
- Sums of Integers—Place pieces in a row to sum to a target number. Includes integers from –9 to 9.

Base Ten Resource Kit

This collection of base ten resources provides enough materials for small group work for 2–4 students. Kit includes a variety of hands-on manipulatives and a comprehensive activity book—*Working with Base Ten Blocks*.

Kit Components:

- Base-Ten Blocks (1 thousand block, 10 hundred flats, 50 ten rods, and 100 unit cubes)
- Base Ten Place Value Frames, 5
- Magnetic Base Ten Place Value Frame
- Write-On/Wipe-Off Base Ten Mats, 10

Jumbo Place Value Dice

Set of four different colored 10-sided dice representing ones, tens, hundreds, and thousands are great for games and activities. Dice are hard plastic and measure 1.5".

⚠ Small Parts*

Grades 2–5

211444 • \$9.99

Place Value Flip Stand

Demonstrate place value with this colorful flip stand! Stand features 7 sets of flip cards, each numbered 0–9. Side one covers place value from ones to millions. Side two provides practice with numbers from thousandths to thousands. Stands 5" high by 17" long.

Grades 2–5

211884 • \$15.99

Place Value Safari

Have your students enter the jungle, where a hungry tiger prowls. Players must fill their safari boards with base-ten units and rods to escape the tiger. To do this, they complete a variety of simple math tasks as they move along the game board. Students will learn about adding and subtracting in tens, the language of exchange, and grouping in tens. Includes playing boards and materials (counters, dice, base ten materials) for four players. ⚠ Small Parts*

Grades 2–5

2-867 • \$29.99

Base Ten Dual Number Line

This versatile tool helps students visualize and solve operations, ratio, and percent problems. It is designed to be used with standard 1-centimeter base ten blocks (units and rods of 10) and has a dry-erase writing surface, allowing students to show their work. Measuring 4" high by 21" long of durable 1 cm foam, it has dual channels that can hold up to 50 base ten units each. The dual channels provide students the ability to represent and model equations and problems in a structured, meaningful way. Includes teaching notes with sample activities for Common Core State Standards. Does not include base ten blocks or rods.

Grades K–4

211589 • \$9.99

Write-On/Wipe-Off Base Ten Mats

Mats have base ten blocks (hundreds, tens, ones) pictured on one side. On the reverse is a grid with labels "hundreds," "tens," and "ones." Each side has space for students to write in numbers. Mats measure 9" x 12" and are made of tough, flexible plastic for use with dry-erase markers. Set of 10 mats.

Grades 1–6

211013 • \$16.99

Desktop Place Value Cards

Children practice place value notation from decimals to billions with this set of 15" x 5" each write-on/wipe-off cards for use with dry-erase markers. Great for any place value activity or with our large format Active Place Value Set (see above). Set of 10.

Exploring Measurement Concepts

By Sandi Cooper and Ruth Harbin-Miles

Each of these books includes more than 40 classroom-tested activities for exploring measurement. Students use grade-appropriate measurement tools such as teddy bears and footprints in grades K-1 and rulers and scales in grades 2-3. With assessment built into each lesson, these fun hands-on activities will provide the foundation for measurement concepts so important in the early grades. Correlated to the standards, these can be used as small-group work or whole-class activities.

Grades 2-4

2-4221 • \$9.99

Pentominoes are the 12 distinct shapes that are made from joining 5 squares. Since their first publication in 1907, pentominoes have become one of the most popular branches of recreational mathematics, studied and used by mathematicians and teachers.

Educationally, pentominoes are a gold mine.

They allow the introduction of important mathematical concepts and skills in a playful and non-threatening context. Students' intuition, problem-solving ability, strategic thinking, and sense of two-dimensional space are also enhanced as they interact with the shapes.

Working with Pentominoes

By Henri Picciotto

Using the 12 pentomino shapes and the lessons in this book, students explore measurement (unit, area, perimeter), numbers (multiples, triangular numbers), geometry (congruence, similarity), and more. Activities range from simple to highly challenging. Includes teacher notes and answer key. 112 pages.

Grades 4-8

211340 • \$19.99

Omnifix® Cubes

They're engaging and remarkably versatile linking cubes. Omnifix Cubes are unique because they come as an "unfolded" net, which is easily snapped to form a cube. With connectors on all six faces, Omnifix Cubes join in any direction to any face of another cube. Students can create rods, blocks, and other geometric shapes. These are manipulatives that encourage problem solving and reasoning as students use modeling skills to build realistic and geometric 3D shapes of various sizes. They're ideal for exploring spatial relationships, patterns, surface area, volume, number bases, fractions, cubed numbers, symmetry, tessellations, and more! Omnifix Cubes come in four brilliant colors and measure 2 cm each. ⚠ Small Parts*

Slopeometer™/Magnetic Coordinate Grid Set

Set includes a Slopeometer for measuring slope as well as the oversized Magnetic Coordinate Grid to make drawing even easier!

Grades 6-12

211898 • \$44.99

Demonstration Magnetic Dry-Erase Coordinate Grid

Demonstrate graphing in the four quadrants with this oversized magnet. Sticks firmly to any magnetic surface. Ideal for use with our Slopeometer! Measures 22" x 22" with 1" squares.

Grades 6-12

211758 • \$24.99

Demonstration Magnetic Dry-Erase Graphing Grid

This oversized write-on/wipe-off magnet makes demonstrating graphing concepts a breeze! Younger students will benefit from the large 2" squares. Sticks firmly to any magnetic surface. Magnet measures 22" x 22".

Math Activators

By Heidi Sabnani and Molly Vokey

The ideal resource to practice, reinforce, or reteach fraction, decimal, and integer concepts.

Many students struggle with the foundational skills they need to master more challenging concepts in middle school and high school. Teachers use *Math Activators* as a discussion starter to help students master key concepts.

In grades 3–5, the activators enrich number talks to reinforce fraction, decimal, and integer concepts as students are learning.

In grades 6–8, teachers use the activators to prompt classroom dialogue and reinforce key concepts with students as they explore grade-level content.

In grades 9–12, the activators are used to guide discussion as students review foundational skills needed to succeed in high school math.

Use *Math Activators* as an engaging ten-minute activity at the beginning of class to support learning. Teachers use the digital resource to display an activator, and the full-color teacher pages provide discussion prompts and sample solutions.

Grades 3–12

212126 • \$34.99

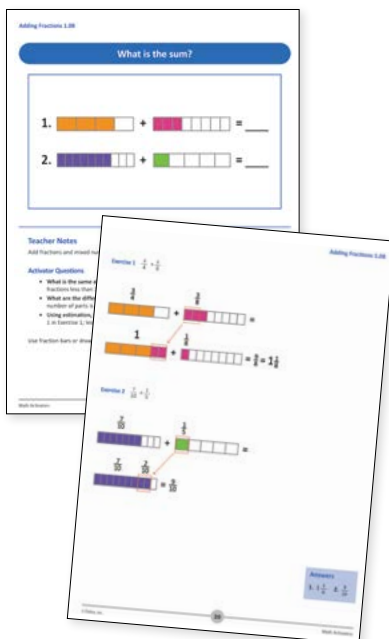

Includes
online access
to digital tools!

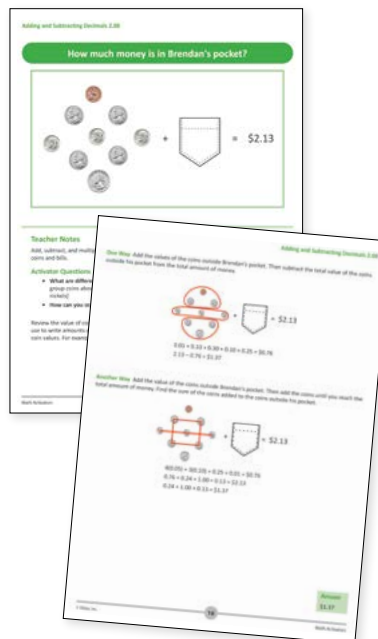

Included with the program:

- 160-page Teacher Guide and Activators
- Digital access to Activators

Integer Beaded Number Line Set

Developed by Dr. Alison J. Mello

Finally, a hands-on tool to help students discover the rules of integer operations! These beaded number lines feature red and yellow beads to represent negative and positive numbers. They are the perfect manipulative to model problems involving all four operations with integers.

The set includes 10 student bead strings with 20 negative red beads and 20 positive yellow beads per string. Twenty-five clothespins are also included for students to mark zero on their number lines. Teachers will appreciate the full-color guide with activities for whole-class, small-group, and independent math stations.

Grades 6–9

211882 • \$48.99

Integer Operations Mats

A write-on/wipe-off tool that allows students to visualize operations with positive and negative numbers. Students model integer problems by placing red and yellow counters or writing on the mat. Features a line at the top to write the equation and a number line at the bottom. On the reverse, use the vertical number line to show negative and positive numbers as upward and downward movements. Set includes 10 (10" x 13") write-on/wipe-off mats and full color activity guide.

Grades 6–9

211883 • \$24.99

Integer Operations Activity Set

This set includes 10 Integer Operations Mats, 200 two-color counters, and an activity-packed book—*Working with Two-Color Counters*. Easily demonstrate integer operation problems on the mats with the two-color counters. The book includes a variety of integer activities as well as problems that focus on fractions, equations, and probability, all using the counters. A great resource for all middle school classrooms. Not packaged for retail.

Grades 5–9

211891 • \$44.99

*See Safety Information on inside front cover for details.

Integer Activity Kit

Give middle school students hands-on resources to help them master integer concepts. Our unique Integer Beaded Number Line Set provides a concrete tool to improve integer understanding. Also includes Integer Operations Mats that can be used with wipe-off markers or the included two-color counters. The included resource book provides a variety of practice activities. Not packaged for retail.

Kit Components:

- Integer Beaded Number Line Set, 10 strings
- Integer Operations Mats, set of 10
- Two-Color Counters, set of 200
- *Working with Two-Color Counters*

Grades 6–9

600031 • \$89.99

Visual Math Dictionary

This reference has over 600 definitions and additional resources. Math terms are explained simply and visually in clear, concise wording with hundreds of illustrations. 130 pages.

Grades 5 and up

2-5278 • \$19.99

Working with Two-Color Counters

This activity guide provides teachers with ideas and techniques to help students better understand abstract mathematical concepts through the use of two-color counters. 96 pages.

Grades 5–8

211336 • \$19.99

Write-On/Wipe-Off Unit Circle Mats

A great way for students to practice evaluating trig functions. Each mat features a unit circle showing all segments on one side and a circle with just x , y segments on the other side. Students can fill in radians, sine, cosine, and tangent using dry-erase markers (not included). Mats measure 9" x 12" and are made of tough, flexible plastic. Set of 10.

Grades 10–12

211245 • \$16.99

PEMDice®

Order of Operations Game

Roll the PEMDice and create equations—just be sure they're correct and follow the mathematical order of operations! Earn points by creating equations that use the most dice. These unique dice feature numbers, fractions ($\frac{1}{2}$, $\frac{1}{3}$, $\frac{1}{4}$), operations (+, −, ×, ÷, $\sqrt{\quad}$, $\sqrt[3]{\quad}$, \wedge , \wedge^2 , \wedge^3 , and !), parentheses, and equal signs. Game includes 30 unique color-coded PEMDice, activity guide with a variety of game options, and shaker. For two students. Small Parts*

Grades 5–12

211293 • \$16.99

PEMDAS is the order of operations. It stands for Parentheses, Exponents, Multiplication, Division, Addition, Subtraction.

Algebra Lab Gear®

By Henri Picciotto

Algebra Lab Gear is a comprehensive manipulative environment designed for the teaching and learning of algebra. The Lab Gear extends the model of base ten blocks by adding “variable” blocks to represent x , y , xy , x^2 , y^2 , and more. The models are particularly helpful for visual and kinesthetic learners as students move the blocks to represent problems in different ways. The materials are designed for use in Pre-Algebra and Algebra I courses. Set is designed for two students working together and consists of 90 pieces. Materials not packaged for retail. Small Parts*

90-piece Student Set

Linear Graphs

Algebra Card Game

This single deck of algebra matching cards is an interactive, hands-on way to teach key algebra concepts.

Improve algebra fluency with these 12 sets of matching cards. Each set includes six cards showing multiple representations of the same equation: coordinate pairs, y-intercept, slope, graph, equation, and standard form. Set includes 72 game cards and activities. For up to 4 players.

Use this new set alone or with our Algebra Game: Linear Graphs set (featured below).

Grades 8–12

211629 • \$15.99

The Algebra Game

Looking for a creative way to get your algebra students collaborating? The Algebra Game is available for three different topics and will challenge students with a variety of games and activities. Each set includes card decks that display graphs, equations, coordinate pairs, and other specific information that support the notation of an equation. Have students play games matching the cards together or take advantage of the unique lessons and reproducible activities featured in the comprehensive teacher's guide. Each set includes four decks with enough cards for up to 12 students to play at the same time and a guide. Grades 7–12.

Linear Graphs

211753 • \$52.99

Quadratic Equations: Basic

211754 • \$52.99

Each set is packaged in an attractive full-color box and includes four decks of cards and comprehensive teaching guide.

Middle School Resource Kit

Middle school students will benefit from the hands-on resources included in this kit! Reinforce key concepts such as algebraic thinking, understanding of integers, Pythagorean Theorem, and more! Kit includes manipulatives, write-on/wipe-off mats, games, and two comprehensive activity books.

Kit Components:

- Algebraic Expression Dominoes
- Algebra Tiles, 10 sets
- *Working with Algebra Tiles*
- Linear Graphs Card Game
- Integer Operations Mats, set of 10
- *Working with Two-Color Counters*
- Two-Color Counters, set of 200
- Write-On/Wipe-Off Coordinate Grid Mats, set of 10
- Pythagorean Theorem Tile Set

Not packaged for retail.

Custom Kits: A Didax Specialty

The possibilities are endless.

Working with Didax, you can create custom kits filled with manipulatives and other resources to address specific curriculum needs, grade-level solutions, and specialized product collections to support a spectrum of educational and retail opportunities.

Our specialists can provide recommendations for product selection, quantities, packaging, and other kit design needs to meet your specific sales and distribution needs.

Take the next step...a conversation!

Work with your Didax Dealer Specialist to talk through your custom kit needs and project parameters, and we'll provide recommendations and project estimates. From there, we can collaborate to create the kits that will open new sales opportunities for you and deliver the solutions your education and retail customers need.

We look forward to talking with you.

Dealer Policies and Terms

Prices

All prices listed in the 2024 Didax catalog and price list are recommended US retail prices and are subject to change without notice. Prices are effective through December 31, 2024.

Back Orders

If stock is not available at time of shipment, the back-ordered item(s) will be shipped separately unless otherwise notified. All international orders will be shipped complete, and back-orders will be canceled. We will notify you of any cancellation of back-ordered product.

Discounts

Didax offers a 50% standard discount to our authorized dealers on proprietary merchandise only, with no minimum purchase. Please note that only items featured in this catalog and listed on the didaxdealer.com website are proprietary.

Payment

Net 30 days from date of invoice. Past due accounts are subject to a 1.5% per month finance charge. Accounts must be current before subsequent shipments will be made. All foreign accounts (except for Canada) are required to prepay all orders.

Shipping and Handling

All shipments are F.O.B. shipping point. Shipping charges and handling cost are prepaid by us and added to your invoice using the most economical carrier unless you provide us with your own information. Next day shipments are available upon request for orders received before 1:00 pm eastern time.

New Accounts

Initial order from new accounts should be prepaid and include bank and trade references along with reseller's license and company information. Shipment on an open account is subject to credit approval.

Returns

Special order items and items not purchased at standard discount are non-returnable.

All returns must be pre-authorized and shipped with the packing slip marked with the RMA number.

Returned goods must be in our current catalog and in saleable condition, clean, unmarked, and undamaged.

Original sale must be within six months of request of return.

20% restocking fee will be applied to all returns.

A merchandise credit will be issued for the allowable return amount.

Unauthorized returns will be refused.

Discontinued items are nonreturnable.

Shortages and Damages

All shortages and damaged merchandise must be reported to Customer Service within 15 days of receipt of shipment. For shortages we will ship the missing item(s) or credit your account. For damages resulting from product defects, we will issue a credit or ship a replacement.

For goods showing visible damage on the shipping carton, please have the carrier note the damage on the freight bill before accepting delivery. Goods damaged in transit must be reported to the carrier immediately. Save all original shipping cartons, packing materials, and damaged items until they have been inspected or your claim has been settled. Please take pictures of damaged items, if possible, and forward to info@didaxdealer.com.
